## Amnes and Mining Stocks

# EOR BIG STRIKES

teresting Stages of Operation.

"Possible sources toward which to look for the new big strike in Tintic district which is to revive interest in the stock

of much merit will be made.
"Then there is the May Day, drifting on the 1,100-foot level for the great Godiva vein which is likely to produce surprises at the additional depth; the Yankee, which is searching for the continua-tion of Uncle Sam's new ore body, or antion of Uncle Sam's new ore body, or another in the same vein; the Grand Central, which has already given proof that it is opening an entirely new mine; the Mammoth, with possibilities of greater things at depth; the Tintic Standard, whose shaft is attaining ore depth in as promising a mineralized formation as was ever opened in Tintic district; Iron King, Montana and Tintic Central, which are pushing development in the great eastern zone, and Dragon Iron, whose churn drills are likely to penetrate bodies of rich ore underneath the significant capping from which the property takes its name.

Looks for Series of Strikes.

With the well-known history of mine "With the well-known history of minemaking in Tintic district and a general knowledge of its formation as basis for judgment, the belief is justified that it would be virtually impossible for these and other operations in progress to be carried much further without in some quarter bringing large results. And I am sufficiently optimistic to predict that the rext few months will witness a series of history-making strikes in Tintic district. The natural inference is that there has never been a better time—perhaps never again will be so good a time as the present to buy mining stock with the certainty of making handsome profits."

#### MORGAN MAY HELP IN COPPER ALLIANCE

That Morgan may take a hand in the copper situation with the idea of bringing conflicting interests into a closer alliance is rumored in Boston, according to Paine, Webber & Co.'s letter, received yesterday over the Pollock wires. Coppers were dull on the Boston market and inclined to sag. Bear traders attempted to breek Copper. Bear traders attempte Rear traders attempted to break Copper Range and North Butte, but offerings were not large enough to make much impression. "On the surface," adds the letter, "the metal situation looks bad, but the stock market looks as if the price of the metal had been discounted."

New York and Philadelphia. cannot be more pleasantly or conveni-Trunk-Lehigh Valley double track route via Niagara Falls. Solid through trains coaches and sleeping cars. Magnifi-

Ely, Tintic and Arizona Properties in High Favor, Says Mining Man.

Inquiry in the east in regard to mining stocks, according to George R. Raymond, general manager of the Ely Resurrection Copper company, is confined to issues of Cobalt, Ely, Arizona and Tintic. Anything else, he declared, he scarcely heard mentioned during a month's sojourn in Boston and New York. He found interest

Market experts believe that, while Iron Blossom may be forced even lower, it will advance rapidly as soon as the margined stock is cleaned up, making it an excellent purchase at present prices. The known value of the mine, with the prospect of a dividend next month, is counted upon to induce buying which will quickly restore a good portion of its recent loss. That other good issues, especially the dividend payers, will act in sympathy goes without saying.

Total number of shares sold, 122,920; value, \$53,201.87. Closing quotations and The Ely Resurrection company owns a arge estate on the northern extension of the Nevada Consolidated mineral zone. the Nevada Consolidated mineral zone. While the ground is being developed with the view of opening a great low-grade copper mine, it has recently opened within the large zone a body of four and a half feet of ore of shipping grade. It was encountered underneath an iron blowout which was stripped in the early days, when considerable high-grade ore was taken from a cut about thirty feet deep and perhaps sixteen feet across. Mr. Raymond had a tunnel driven which tap-Closing quotations and and perhaps sixteen feet across. Mr. Raymond had a tunnel driven which tapped the ore at eighty feet depth, and the ore which is being taken out averages better than \$35 a ton without sorting.

\*Recent developments in the Butte & Ely and other properties, where churn drills have proven that the district's lime formation is an overflow, or simply a capping of the copper-porphyry deposits, has greatly enhanced the prospects of Ely Resurrection, which is soon to inaugurate drill work upon its own account.

# GULUFIELD HAS

Monster Body of High-Grade

Clermont shaft of the Goldfield Consolidated Mines company has been opened in the lattice formation, which underlies the dactic, according to advices from the camp, a body of ore which has been crosscut 27 feet, showing average values of from \$1,200 to \$1,800 a ton. The strike is important, not only on account of its proving that high-grade ore is to be found at depth and in formation in which it had been heretofore believed that no values could ever be found.

"More than a month ago," says the Goldfield News, in its account of bonanza developments in the Clermont shaft, "high values were found in spots along the hanging wall in the drift on the 730 and \$300 to \$100 a ton. But the vein had not been crosscut except near the point where ore was first encountered. It was stated at that time that an upraise would be put up at a certain point further ahead to connect with the place where a certain individual was caught high grading where the crosscut from the ahead to connect with the place where a certain individual was caught high grading where the crosscut from the followed the point where ore shoot on the 600 level some months ago. The trespasser was later given a prison sentence for his indiscretion.

Values Are Phenomenal.

Values Are Phenomenal.

"Ground was broken out on the north side of the drift on the 730 level for starting this upraise, and values immediately began to increase as the vein was further worked into away from the hanging wall, along which the crosscut-drift had been run. The raise is now up about sixty feet and is showing very high values. With the raise well up and away from the chamber that had been cut in the ore to start it, it was decided ten days ago to crosscut the vein to the footwall. Almost the first round of shots opened the entire crosscut into ore that sampled in the mine cars from \$1,205 to \$1,822 per ton. This crosscut has proceeded for twenty-seven feet through ore of the same grade, and the heading of the crosscut has sampled \$2,400 per ton. The general character of the ore is soft and brecciated, but through it are streaks of pure gold are by no means scarce. This is without doubt the most important discovery ever made on the Mohawk vein system.

"Drifting is now under way preparatory to stoping with square sets. The heading of the long crosscut to the Mohawk is in over 700 feet from the Clermont shaft, and is evidently just entering the main Mohawk ledge, for values are again appear. Ajax, 400 at 36c. # ARE FIGHTING FOR

Gunn-Thompson Interests Oppose Guggenheim Plan for Merger.

The Guggenheim interests are planning n absorption of the Cumberland Ely ompany by the Nevada Consolidated Ore Is Opened in Latite
Formation.

On the 600-foot level of the Mohawk mine and on the 730 and 860 levels of the Clermont shaft of the Goldfield Consolidated Mines company has been opened in Sait Lake City, who originally placed the Clerk of High Sait Company and the basis of a trade, which they would be willing to make, would be 3½ shares of Cumberland Ely stock for one share of Nevada Consolidated, or \$7.50 per share for Cumberland Ely stock with Nevada Consolidated at \$24, says the Boston News Bureau.

There are several thousand stockholders of the Cumberland Ely company and outside of the Guggenheims, the dominating interests have been William B. Thompson of New York and George E. Gunn of Sait Lake City, who originally placed the

for one might be acceptable to the general body of stockholders.

#### EMMA COPPER GETS FINANCES IN FORM

Pressing obligations of the Emma Cop per company, only recently classed as "dead one," were cleared up yesterda when two mortgages representing an in debtedness of \$3,500 were released. Thes payments make a total of \$7,172.73 of in debtedness paid from the proceeds of the late assessment, with the expense of resuming operations covered and a good-sized balance left in the treasury. Con-siderable money continues to come in from the payment of the assessment, delinquen-cy of which was postponed for 30 days, although all of the large holders came in early.
Manager W. M. Wantland and Frank A. Taylor, formerly of the Bingham Cen-tral Standard, expect to go to the Emma Copper company's mine in Alta today to take an inventory of development results.

## TREASURE HILL IS ACTIVE.

Favorable Developments in Park City
Property Indicated.

Favorable developments in the Uintah Treasure Hill mine, where the management has for some time been hot on the irail of an ore body, were indicated by the market action yesterday of the company's stock. Opening at 7½ cents on the open board, offerings of the stock were so readily taken that the price was quickly run up to 9½ cents, with 3,000 shares sold. Ely Consolidated, which has been active in New York the last two or three weeks, registered the new high price of 34 cents on this market. Unlisted quotations:
